# nebula

**ZYXEL** NETWORKS

## Zyxel's Secure Cloud Networking Platform

Launch a whole network in minutes

## KEY FEATURES

Configure and deploy network devices without unboxing

Includes built-in user management for those who don't have the expertise or requirements for external platforms like RADIUS

VPN connections can be configured through a few simple clicks, without any complex VPN configuration steps

Firmware updates can be scheduled to suit each site's requirements
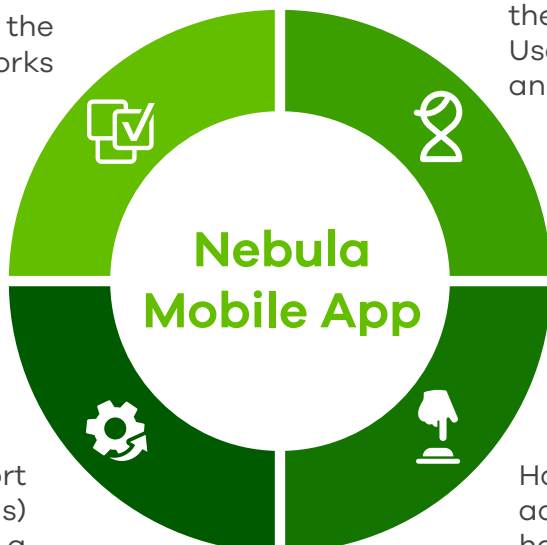

Supporting over 80 devices

## NEBULA Control Center

Access **anywhere, anytime** with an internet connection without the complexity of remote site access.

Gives instant notification on the status of connected networks

Simple guest access including the support for Captive Portal, User and device management, and auto guest protection

### Nebula Mobile App

Designed to support multi-tenant (organizations) and individual sites, all in a single pane of glass

Hassle-free installation of additional software and hardware
