

USG FLEX H SERIES

The Future of Secure and High-Performance Networking

USG FLEX H series is powered by Zyxel's high-performance hardware and AI security cloud architecture with multi-layered defense for firewall, network, and users.

ZYXEL
NETWORKS

Ultra-High Performance

Next-gen multi-core hardware

Fast path technology for ultra-high efficiency

Performance boost up to 3x

2.5 Gbps and 10 Gbps port speed options

Software-defined ports for flexibility

Configuration options for WAN or LAN

Port Flexibility & Speed Options

PoE+ Integration

Up to 2 x 30W PoE+ integrated ports on certain models

Simplifies installations

Reduces costs by powering devices directly from USG FLEX H

Hassle-free Network Management

- Utilize Nebula for centralized cloud management
- Configure/deploy devices centrally
- Manage multiple devices efficiently

nebula

AI-Powered Cloud Cybersecurity

AI-powered cloud intelligence

Constant evolution of network security

Sandboxing, anti-malware, DNS/IP/URL filtering, IPS, and application patrol

Fast & Powerful Operating System

Introduction of the latest operating system

Minimizes system response time

New intuitive UX (User Experience) design
